

SMOKING HOOKAH FOR 1 HOUR IS EQUIVALENT TO SMOKING **100 CIGARETTES.**

=

Hookah smoking is ***NOT*** safe—

- ⓧ The water does not filter out the harmful chemicals.
- ⓧ Herbal or not, hookah smoke leads to cancer and heart disease.
- ⓧ Many communicable diseases can be spread using hookah – tuberculosis, herpes, meningitis and hepatitis, to name just a few.

The way you live your life matters - don't smoke.
