Firefox Single Sign On Settings

In order to allow Firefox to use single-sign on (SSO) each user will need to make this change in their browser setting manually.

1. Open the Firefox browser
2. In the address bar, type `about:config` and hit Enter

3. In the search box, type the following name (or copy and paste from this document)
   • `network.automatic-ntlm-auth.trusted-uris`

4. Double-click the entry and enter `.suny.edu`
