

REQUESTS TO CHANGE A CIP CODE TO A DHS STEM DESIGNATED DEGREE PROGRAM

Because of the benefits of a STEM CIP designation, campuses may seek to change a program CIP code in order to realize these benefits. Framed by the leading principles of accuracy, transparency, and consistency, the following guidelines and process are intended to provide information to support requests to change a CIP code to a Department of Homeland Security STEM Designated Degree Program.

Guidelines

- For program completers to be eligible for the [STEM OPT Extension](#), they must have graduated from an [eligible](#) baccalaureate, master's, or doctorate degree program (note: though certificate programs can be assigned a CIP code from the [STEM Designated Degree Program list](#), certificate programs do not "in and of themselves" convey eligibility for the STEM OPT Extension)
- Only one CIP code is assigned to a program (CIP codes are not assigned to individual tracks; if the program as a whole is deemed ineligible for a STEM CIP, but a program track could be eligible, this track can be disaggregated to create a new standalone program with its own CIP code)
- The relevant and determining factor in CIP code assignment is the program curriculum and the intent is to assign the best-fit CIP as determined through a comparison of the curriculum with the CIP description
- For a program to be assigned a STEM CIP, 50% or more of the required curriculum must be STEM, consistent with the definition of STEM as derived from the DHS STEM CIP list (there exist competing definitions of STEM, but this is the definition applied in this instance)
- Program electives may be applied to the 50% threshold only if all choices are STEM so that there is no avenue for a student to complete the program without having taken at least 50% of their courses in STEM
- For a course to be considered STEM, the majority (not just some) of the course content must be STEM
- Although DHS lists 4 primary CIPs at the 2-digit CIP level as STEM – Engineering (14), Biological & Biomedical Sciences (26), Math & Statistics (27), and Physical Sciences (40) – that does not eliminate the 6-digit CIP levels of the remaining 2-digit CIP codes; for example, most Business Management CIP codes (52) are not considered STEM, but the following at the 6-digit level are on the STEM list: business statistics, actuarial science, and management sciences and quantitative methods
- As much as possible, the CIP code should be consistent system-wide for similar SUNY programs
- The CIP code should match, as close as possible, with the assigned NYSED HEGIS code

Process to Request a Change to a STEM CIP

To request to change a [CIP code](#), the campus Chief Academic Officer (or designee) must submit to program.review@suny.edu a cover letter (addressed to the System Provost) and the following information (which must have been previously approved by the program faculty and the applicable dean):

1. Program Title:
2. Program Award:
3. Total Program Credits:
4. Program SED Code:
5. HEGIS:
6. Current CIP (Number, Title, and Definition):
7. Proposed CIP (Number, Title, and Definition):
8. Program Description or Program Learning Outcomes:
9. Brief (i.e., one paragraph) rationale for the change (as per the guidelines, the determining factor in CIP code assignment is the program curriculum and no other factor is relevant; therefore, only include information about the curricular content of this specific program, not other information such as the recruitment benefit or the research profile of program faculty):
10. Attestation that the change will not have adverse impacts on students:
11. Curriculum Table for *All Required STEM Courses* and *All STEM-Restricted Electives* with a Crosswalk to the Components of the CIP Definition:

Course Number	Course Title	Credits	Applicable Component(s) of the CIP Definition	Course Description*

*In addition to course descriptions, it may be necessary to provide course syllabi, but syllabi need not be submitted unless requested

ELIGIBLE CIP CODES FOR THE STEM OPT EXTENSION

DHS maintains a complete list of fields that fall within the regulatory definition of “STEM field” that qualifies certain degrees to fulfill the extension requirement. This list is known as the STEM Designated Degree Program list. The Department of Education’s Classification of Instructional Program (CIP) taxonomy serves as the basis for the STEM OPT extension.

DHS will publish any subsequent updates to the STEM Designated Degree Program list in the Federal Register.

Eligible CIP Codes

DHS’s STEM designated degree program list includes all STEM fields qualifying an F-1 student for a STEM OPT extension. DHS determined a “STEM field” is a field included in the Department of Education’s CIP taxonomy within the two-digit series containing engineering (CIP code 14), biological sciences (CIP code 26), mathematics (CIP code 27), physical sciences (CIP code 40) or a related field. The current list is similar to the previous list under the 17-month STEM OPT extension.

All fields of study in the four core STEM areas of engineering, biological sciences, mathematics and physical sciences are included.

In general, related fields will include fields involving research, innovation or development of new technologies using engineering, mathematics, computer science or natural sciences (including physical, biological and agricultural sciences).

This means that DHS may consider a degree to be in a STEM field even if it is not within the CIP two-digit series for the four identified core areas and may designate CIP codes meeting the definition at the two-, four- or six-digit level.

Basis for STEM Field Definition

DHS drew upon the Department of Education’s National Center for Education Statistics (NCES) definition of “STEM field” to create the STEM Designated Degree Program list.

The NCES definition is grounded in the Department of Education’s expertise in the area of higher education, and it identifies STEM fields using CIP terminology that is widely used by U.S. institutions of higher education. DHS’s modified definition provides a straightforward and objective measure by which DSOs and adjudicators can identify STEM fields of study.

Appendix B: DHS STEM Designated Degree Program List

Retrieved from <https://www.ice.gov/sites/default/files/documents/stem-list.pdf>; February 10, 2022

The U.S. Department of Homeland Security (DHS) STEM Designated Degree Program List is a complete list of fields of study that DHS considers to be science, technology, engineering or mathematics (STEM) fields of study for purposes of the 24-month STEM optional practical training extension described at *8 CFR 214.2(f)*. Under *8 CFR 214.2(f)(10)(ii)(C)(2)*, a STEM field of study is one “included in the Department of Education’s Classification of Instructional Programs taxonomy within the two-digit series containing engineering, biological sciences, mathematics, and physical sciences, or a related field. In general, related fields will include fields involving research, innovation, or development of new technologies using engineering, mathematics, computer science, or natural sciences (including physical, biological, and agricultural sciences).”

Accordingly, this list designates the following four primary CIP series at the 2-digit CIP code level: Engineering (14), Biological and Biomedical Sciences (26), Mathematics and Statistics (27) and Physical Sciences (40). Any new additions to those areas will automatically be included on this STEM Designated Degree Program List.

This list also includes CIPs from the following 18 related CIP series at the 6-digit CIP code level: Agricultural/Animal/Plant/Veterinary Science and Related Fields (01); Natural Resources and Conservation (03); Architecture and Related Services (04); Communication, Journalism and Related Programs (09); Communications Technologies/Technicians and Support Services (10); Computer and Information Sciences and Support Services (11); Education (13); Engineering/Engineering-Related Technologies/Technicians (15); Military Science, Leadership and Operational Art (28); Military Technologies and Applied Sciences (29); Multi/Interdisciplinary Studies (30); Science Technologies/Technicians (41); Psychology (42); Homeland Security, Law Enforcement, Firefighting and Related Protective Services (43); Social Sciences (45); Transportation and Materials Moving (49); Health Professions and Related Programs (51); and Business, Management, Marketing and Related Support Services (52).
