Memorandum to Presidents

Date: November 13, 1973
From: Office of the Vice Chancellor
       for Campus Development
Subject: Energy Conservation

As you know, there is an increasing concern in many quarters over the approaching energy crisis.

By letter dated October 19th, Governor Rockefeller has asked that governmental agencies and public officials take the lead in conserving our energy resources. He has directed all State agencies to initiate specific action and to report the specific measures taken in accordance with his recommendations. A copy of his directive is enclosed herein.

As you may be aware, Don Lambert has been in contact with all plant superintendents and facility program coordinators concerning the University's energy conservation program. He has sent them a copy of the "Report of Ad Hoc Committee on Energy Efficiency in Large Buildings to the Interdepartmental Fuel and Energy Committee of the State of New York". He has also requested specific information along the lines of the Governor's directive. If your campus has not yet responded to his request, we urge you to do so promptly.

We are asking you to designate an energy conservation officer who will have the responsibility of coordinating energy conservation efforts, and monitoring the results achieved, on your campus. Please advise me by November 23, 1973 of the person so designated.

I am also enclosing herewith, a copy of the EFL publication, The Economy of Energy Conservation in Education Facilities, which I believe you will find helpful.

Thank you for your cooperation and assistance in this important endeavor.

Oscar E. Lanford
