Child Care, Request for Proposals
Presidents, Community Colleges

The 1987-88 state budget appropriation for the community colleges of the State University of New York contains $1,065,000 for student-benefit child care centers. The University will establish a panel composed of Central and campus staff to review campus requests and make final recommendations to the Acting Chancellor on the distribution of the child care appropriation.

All interested community colleges are requested to review current and future student child care needs and to submit requests for funding based on local needs. Grant requests should not exceed $75,000 per college. The form to be used for funding proposals is attached. Deadline for submittals is June 15. Although we expect no changes to this Request for Proposals, it is currently being reviewed by the State Division of the Budget and is subject to its approval. Should alterations be required, we will inform you immediately.

Colleges which received grants for 1985-86 and/or 1986-87 are encouraged to apply for funding to complete projects not yet fully funded and/or pursue additional improvements. Colleges which did not apply in the past are welcome to submit proposals for 1987-88.

The budget language has been amended to remove the requirement that centers be self-sufficient by 1988-89. Accordingly, references to this requirement made in the past two years are removed from this year's guidelines and proposal form. The self-sufficiency requirement had led to the committee's decision generally to avoid grants for operating expenses and to emphasize funding for one-time costs such as construction, renovation or equipment purchases. It is expected that, within the total allocation, proposals including requests for funding of operating expenses may be more favorably reviewed.
The planned distribution of the appropriation is designed to meet a variety of particular needs:

1. Achieve compliance with health, safety, and welfare codes;
2. Develop new centers at campuses without existing centers;
3. Expand existing centers to accommodate additional children;
4. Improve existing sites by renovating inadequate facilities;
5. Purchase of necessary equipment; and
6. Enrich existing operations by increasing inadequate staffing ratios.

In summary, the plan is intended to establish new child care programs at community colleges where justified and enrich the quality of the existing programs within the limitations of the available funds.

Plan Description and Guidelines:

Disbursement of funds from the student-benefit appropriation will be made only if the center complies with the following conditions:

a. All established or planned centers must possess all requisite licenses, certificates, etc., appropriate to their respective program, including a license from the Department of Social Services (DSS) or a statement that a license will be sought from DSS upon completion of renovations and required program changes dependent upon receipt of funding through this program.

b. Centers must receive written approval from campus administration for the space occupied, outlining the prescribed use of the space.
c. Centers must show proof of accident and liability insurance coverage at levels deemed sufficient to relieve the State, the University, and individual campuses from legal and financial liability in relation to the center's operation.

d. Centers are required to participate fully in program reviews and audits conducted by the University, campus, and State.

e. Center facilities must comply with the requirements of the New York State Department of Social Services, the New York State Building Construction Code, and the National Fire and Safety Code.

f. Center proposals must include a provision for matching funds of at least 35 percent from such sources as fees; in-kind services, such as space, heat, light, maintenance; or funds from federal, local sponsor, or other sources.
