The US Department of State is requesting social media identifiers from international students as they apply for visas to study in the country as part of a vetting process that it says will protect US citizens.

Applicants are being asked to share social media profiles from around 20 platforms they may have used in the previous five years. Photo: Flickr

In this 2011 photo, Hu Jintao, then China's president, visits the Confucius Institute at the Walter Payton College Preparatory High School in Chicago. China established more than 100 Confucius Institutes, which provide language and culture programs, at U.S. schools. But at least 13 universities have dropped the program due to a law that raises concerns about Chinese spying.

SUSTAINABLE DEVELOPMENT GOALS

The State University
of New York

“We have raised the theme of global learning... not because we think we know so well what global learning in college means. We genuinely don't... We are here out of compassion and heartfelt tough - minded concern because there is urgency, a critical need to understand what global learning is, what our global moment and condition mean, and what to do as educators with that knowledge for our students – right now and into the future.”
