Workshop 2, “Structure,” Notes:

Task 1: Literature

- Access to technology increases exposure to literature & culture;
- On-line and hybrid courses may also increase exposure in certain circumstances (off-site students);
- Inclusion of film has successfully mitigated fear of literature.

Task 2: Tracks

- Many of us already work with “skeleton” programs. Tracks may exist on paper but not in reality due to limited resources;
- Areas in which many of us have already expanded and would like to continue expanding include film and study abroad opportunities.

Task 3: Study Abroad

- Link to existing programs, provide before/after language courses;
- Bring foreign students to campus;
- SUNY-State Dept. grants for culture & language across the curriculum.
